

## 1. IDENTIFICATION OF THE MIXTURE AND OF THE COMPANY

### 1.1 Product identifier

**Trade name**

Oxe

### 1.2 Relevant identified uses of the mixture and uses advised against

#### **1.2.1 Relevant identified uses**

For professional use only as an agricultural herbicide.

#### **1.2.2 Uses advised against**

Do not use for any other purpose.

### 1.3 Details of the supplier of the safety data sheet

Agform Ltd., Hilldale Farm Research Centre, Titchfield Lane, Wickham Lane, Hampshire, PO17 5NZ. United Kingdom

Telephone: 01329 836930  
Email: msds@agform.com  
Web: www.agform.com

### 1.4 Emergency telephone number

|   |   |
|---|---|
| For advice on medical emergencies, fires or major spills: | 01329 836930  |
| Available   | 24hr  |
| Time Zone   | GMT   |
| Language(s) of phone service                              | English   |
| UK National Poisons Information Service:                  | +44 (0)121 507 4123 (For health professionals only) |
| Available   | 24h   |
| Time Zone   | GMT   |
| Language(s) of phone service                              | English   |

## 2. HAZARDS IDENTIFICATION

### 2.1 Classification of the substance

#### **Classification according to Regulation (EC) no. 1272/2008 [CLP/GHS]**

Acute Toxicity , Category 4 (inhalation: dust/mist);

H332: Harmful if inhaled

Aquatic Acute Toxicity, Category 1;

H400 - Very toxic to aquatic life

Aquatic Chronic Toxicity, Category 1;

H410 - Very toxic to aquatic life with long lasting effects

#### **Classification according to Directive 67/548/EEC or 1999/45/EC**

T: Toxic; R23: Toxic by inhalation.

N: Dangerous for the environment; R50/53: Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

#### **Additional information**

For abbreviations, refer to Section 16.

### 2.2 Label elements

#### **Labelling according to Regulation (EC) no. 1272/2008 [CLP/GHS]**

Pictograms:

Signal Word:

Warning

Hazard statements:

H332: Harmful if inhaled

H410: Very toxic to aquatic life with long lasting effects

EUH401: To avoid risks to human health and the environment comply with the instructions for use.

**Precautionary statements:**

P261: Avoid breathing spray

P304 + P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P312: Call a POISON CENTER or doctor/physician if you feel unwell

P391: Collect Spillage

P501: Dispose of contents / container to a licensed hazardous-waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste.

**2.3 Other hazards**

None known

**3. COMPOSITION / INFORMATION ON INGREDIENTS****3.2 Mixtures****Description of the mixture:**

Suspension concentrate (SC)

Azoxystrobin 250 g/l

| Chemical Name     | CAS-No.     | EC-No. | Index No. | Concentration (W/W) | 67/548/EEC Classification | CLP (Reg. 1278/2008) Classification  |
|-------------------|-------------|--------|-----------|---------------------|---------------------------|--|
| Azoxystrobin      | 131860-33-8 | -      | -         | 25 %                | T, N<br>R23, R50/53       | Acute Tox. 3<br>(inhalation:<br>dust/mist)<br>Aquatic Acute 1<br>Aquatic Chronic 1<br>H331 H400 H410 |
| Other ingredients | -           | -      | -         | To 100 %            | Not classified            | Not classified   |

**Additional information**

For full text of R-phrases, see Section 16.

**4. FIRST AID MEASURES****4.1 Description of first aid measures****General notes:**

If symptoms occur after exposure to this product, seek medical attention immediately and show the product label or this SDS. Remove to fresh air and keep at rest. Do not allow smoking or eating. Take off all contaminated clothing and footwear.

**Following inhalation:**

Remove to fresh air and keep at rest in half-upright position. Seek medical attention immediately.

**Following skin contact:**

Remove all contaminated clothing. Wash skin with soap and rinse with plenty of water. Seek medical attention if irritation arises. Wash clothes before re-use.

**Following eye contact:**

Immediately rinse with water. Holding eyes open, continue rinsing for 15 minutes at least. Remove contact lenses as soon as possible. Seek medical attention immediately.

**Following ingestion:**

If swallowed, DO NOT INDUCE VOMITING: seek medical advice immediately and show this container or label. Remove any residues from mouth and rinse it with plenty of water. Offer the casualty 1 or 2 glasses of water to drink. Never give anything by mouth to an unconscious person.

**Self-protection of first aider:**

Personal protective equipment for first aid responders is recommended according to potential for exposure (refer to Section 8).

**Notes for the doctor:**

No specific antidote. Treat symptomatically (decontamination, vital functions). Call a Poison Centre immediately for treatment advice. In case of ingestion gastric lavage may be necessary (with proper laryngeal control). Before emptying the stomach, assess the potential danger arising from lung aspiration against the product toxicity. Report to Agform Limited any unusual symptoms occurring after exposure by any route.

**4.2 Most important symptoms and effects, both acute and delayed**

No additional information on symptoms and effects available.

**4.3 Indication of immediate medical attention and special treatment needed**

No specific antidote. Treat according to symptoms.

**5. FIRE FIGHTING MEASURES****5.1 Extinguishing media****Suitable extinguishing media:**

Carbon dioxide, water, foam, dry chemical

**Unsuitable extinguishing media:**

Non known - use suitable extinguishing media listed above.

**5.2 Special hazards arising from the mixture****Hazardous combustion products**

Avoid breathing smoke or mists when firefighting. Do not allow contaminated fire-fighting water to enter watercourses or drains.

**5.3 Advice for fire-fighters**

Clothing conforming to EN469 should be sufficient to deal with fires involving the substance.

However, a Self-Contained Breathing Apparatus (SCBA) may be required if there is a potential for exposure to combustion fumes.

**5.4 Additional information**

Provide storage and work areas with suitable fire extinguishers.

Call the Fire Brigade at once to deal with all fires involving pesticides unless the fire is small and immediately controllable. Spray unopened containers with a mist spray to keep cool. If without risk, remove intact containers from exposure to fire. Contain fire-fighting water, bunding if necessary with sand or earth. Do not allow contamination of public drains or surface or ground waters. Dispose of fire debris and contaminated water as advised in the DEFRA "Pesticides: Code of Practice for Using Plant Protection Products".

**6. ACCIDENTAL RELEASE MEASURES****6.1 Personal precautions, protective equipment and emergency procedures****6.1.1 For non-emergency personnel**

Protective equipment: Remove immediately any contaminated clothing. Wear prescribed personal protective equipment to prevent contact with eyes and skin. A Self-Contained Breathing Apparatus (SCBA) may be required if there is an elevated risk for exposure.

Emergency procedures: Call the emergency services if the release is not immediately controllable. If the release is localized and immediately controllable, provide sufficient ventilation and control the release at its source.

**6.1.2 For emergency responders**

Clothing conforming to EN469.

**6.2 Environmental precautions**

Use appropriate containment to avoid environmental contamination. Control the release at its source. Contain the spill to prevent it from spreading, contaminating soil or entering sewage and drainage systems or any body of water. Inform the local water company if the release enters drains and the Environment Agency (England and Wales), the Scottish Environmental Protection Agency (Scotland) or the Environment and Heritage Service (Northern Ireland) if it enters surface or ground waters.

**6.3 Methods and material for containment and cleaning up****For containment**

Clean up spills immediately and place in a compatible disposal container. Contain spill by diking with earth, sand or absorbent material and place into a compatible marked disposal container.

**For cleaning up**

Scrub area with a hard water detergent. Soak up wash liquid with additional absorbent material and place into a compatible marked disposal container. Seal container and arrange for disposal.

**Other information**

Not Applicable

**6.4 Reference to other sections**

Refer to Section 8 for personal protective equipment and to Section 13 for disposal instructions.

**7. HANDLING AND STORAGE****7.1 Precautions for safe handling**

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Provide suitable ventilation in the areas where the product is stored and used. Contaminated work clothing should not be allowed out of the workplace. Avoid all contact by mouth, with eyes and skin. Wear personal protective equipment as specified in Section 8. When using, do not eat, drink or smoke. Remove contaminated clothing and protective equipment before meals and after work. Wash hands and exposed skin before meals and after work. Wash all protective clothing thoroughly after use, especially the insides of gloves.

### **7.2 Conditions for safe storage, including any incompatibilities**

The material is stable under normal ambient conditions. Keep in original container, in a dry, cool and safe place. Store in a locked, suitable store. Keep away from any source of ignition. Do not store in proximity of sources of ignition and direct sunlight. Keep out of the reach of children and unauthorised personnel. Keep away from food, drink and animal feeding stuffs.

### **7.3 Specific end use(s)**

Herbicide for professional use as directed by the product label, every other use is hazardous.

## **8. EXPOSURE CONTROL/PERSONAL PROTECTION**

### **8.1 Control Parameters**

#### **Occupational Exposure limit values**

No occupational Exposure limit values have been set for the mixture or its components.

#### **Information on monitoring procedures**

None available.

### **8.2 Exposure controls**

#### **8.2.1 Appropriate engineering controls**

Engineering controls and appropriate work processes must be used to eliminate or reduce worker and environmental exposure in the areas where the substance is handled, transported, loaded, unloaded, stored and used. These measures must be adequate for the extent of the actual risk. Provide adequate local exhaust ventilation. Use specialized transfer systems if available.

#### **8.2.2 Personal protection equipment**

For normal use/handling refer to the product label. In all other cases the following apply:

##### **Eye and face protection**

Avoid contact with eyes. Wear suitable eye and face protection (EN 166).

##### **Skin protection:**

**Hand protection:** Wear suitable protective gloves against chemicals (EN 374 part 1, 2, 3). Nitrile rubber min. 0.5mm thick and 300mm long gloves are the ones proven to be the most suitable according to tests on pesticide products.

Wash the gloves thoroughly after each use, especially the insides. Replace gloves if damaged and before exceeding the breakthrough time.

**Body protection:** Avoid contact with skin. If there is a significant potential for contact, wear suitable coveralls (ISO 13982-1, Type 5, EN 13034, Type 6).

**Other skin protection:** None specified.

**Respiratory protection:** If a risk assessment shows that engineering controls do not provide adequate respiratory protection to exposure to spray particles, wear particle filtering half mask (EN 149) or half mask connected to particle filter (EN 140 + 143).

#### **8.2.3 Environmental exposure controls**

Implement all applicable local and community environmental protection legislation. Refer to Section 15. Use appropriate containment to avoid environmental contamination. Do not empty into drains. Do not contaminate water with the product or used container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads. Refer to Section 12 and 13.

## **9. PHYSICAL AND CHEMICAL PROPERTIES**

### **9.1 Information on basic physical and chemical properties**

- |  |   |
|--|---|
| a) <i>Appearance:</i>                              | Viscous liquid  |
| <i>Colour:</i>                                     | White   |
| b) <i>Odour:</i>                                   | Faint   |
| c) <i>Odour threshold:</i>                         | Not determined – not required under all applicable pesticide legislation. |
| d) <i>pH:</i>                                      | Mixture: to be determined.  |
| e) <i>Melting point/freezing point:</i>            | Azoxystrobin: 116°C (purity: 990 g/kg). Mixture: to be determined.        |
| f) <i>Initial boiling point and boiling range:</i> | Azoxystrobin: Above 360°C. Mixture: to be determined.                     |
| g) <i>Flash point:</i>                             | Mixture: to be determined.  |

|   |  |
|---|--|
| <i>h) Evaporation rate:</i>                             | Not available - not required under all applicable pesticide legislation.   |
| <i>i) Flammability (solid, gas):</i>                    | Not applicable (liquid)  |
| <i>j) Upper/lower flammability or explosive limits:</i> | Not applicable – the mixture is water-based  |
| <i>k) Vapour pressure:</i>                              | No significant volatility – the mixture is water-based   |
| <i>l) Vapour density:</i>                               | Not applicable - not required under all applicable pesticide legislation.  |
| <i>m) Density:</i>                                      | Mixture: to be determined.   |
| <i>n) Solubility(ies)</i>                               |  |
| <i>Solubility (water):</i>                              | Not applicable - not required under all applicable pesticide legislation.  |
| <i>o) Partition coefficient: n-octanol/water:</i>       | Azoxystrobin: Log $P_{o/w}$ 2.5 (25 °C, no pH dependency)  |
| <i>p) Auto-ignition temperature:</i>                    | Mixture: to be determined.   |
| <i>Minimum Ignition Temperature:</i>                    | Not available  |
| <i>Minimum Ignition Energy:</i>                         | Not available  |
| <i>q) Decomposition temperature:</i>                    | Mixture: to be determined.   |
| <i>r) Viscosity:</i>                                    | Mixture: to be determined.   |
| <i>s) Explosive properties:</i>                         | Mixture: to be determined. Not expected to be explosive (based consideration of components and a similar formulation). |
| <i>t) Oxidising properties:</i>                         | Mixture: to be determined. Not expected to be oxidising (based consideration of components and a similar formulation). |

## **9.2 Other information**

None

## **10. STABILITY AND REACTIVITY**

### **10.1 Reactivity**

Non-reactive when stored in original container under normal conditions of storage and use.

### **10.2 Chemical stability**

Stable when stored in original container under normal conditions of storage and use.

### **10.3 Possibility of hazardous reactions**

No hazardous reactions when stored in original container under normal conditions of storage and use.

### **10.4 Conditions to avoid**

Do not store in proximity of sources of ignition and direct sunlight.

### **10.5 Incompatible materials**

Avoid contamination with strong oxidisers

### **10.6 Hazardous decomposition products**

Toxic oxides of carbon and nitrogen

## **11. TOXICOLOGICAL INFORMATION**

### **11.1 Information on toxicological effects**

#### **11.1.1 Substances**

Not Applicable

#### **11.1.2 Mixtures**

Data contained in parts a – j are for the active ingredient azoxystrobin.

#### **a) Acute toxicity:**

|   |  |
|---|--|
| <b>LD<sub>50</sub> oral, rat:</b>       | > 5000 mg/ kg bw                       |
| <b>LD<sub>50</sub> dermal, rat:</b>     | > 2000 mg/ kg bw                       |
| <b>LC<sub>50</sub> inhalation, rat:</b> | 0.7 mg/L air (MMAD <sup>8</sup> <2 µm) |

#### **b) Skin corrosion/irritation:**

Slight irritant

#### **c) Serious eye damage/irritation:**

Slight irritant

#### **d) Respiratory or skin sensitization:**

Not a sensitiser (Magnusson and Kligman test)

#### **e) Germ cell mutagenicity:**

Not genotoxic *in vivo*

#### **f) Carcinogenicity:**

No carcinogenic potential.

#### **g) Reproductive toxicity:**

No effects on reproduction or development.

#### **h) STOT-single exposure:**

Not classified on the basis of active ingredient.

- i) **STOT-repeated exposure:** Not classified on the basis of active ingredient.  
j) **Aspiration hazard:** Not classified on the basis of active ingredient.

## 12. ECOLOGICAL INFORMATION

### 12.1 Toxicity

#### Acute Toxicity

Data contained in this section are for the active ingredient azoxystrobin

|  |            |
|--|------------|
| <b>LC<sub>50</sub> fish, <i>Oncorhynchus mykiss</i> (96h):</b>                 | 0.47 mg/l  |
| <b>EC<sub>50</sub> aquatic invertebrates, <i>Macrocyclus fuscus</i> (48h):</b> | 0.13 mg/l  |
| <b>ErC<sub>50</sub> algae, <i>Selenastrum capricornutum</i> (72h):</b>         | 0.014 mg/l |

#### Honey bees:

|  |             |
|--|-------------|
| <b>LD<sub>50</sub> oral, <i>Apis mellifera</i> (48h):</b>    | >25 µg/bee  |
| <b>LD<sub>50</sub> contact, <i>Apis mellifera</i> (48h):</b> | >200 µg/bee |

**12.2 Persistence and degradability:** Not readily biodegradable

**12.3 Bioaccumulative potential:** No potential for bioaccumulation indicated

**12.4 Mobility in soil:** Moderately mobile

**12.5 Results of PBT and vPvB assessment:** No PBT or vPvB assessments have been carried out on the mixture; please refer to 12.1, 12.2 & 12.3.

**12.6 Other adverse effects:** Not determined.

**12.7 Additional Information:** None

## 13. DISPOSAL CONSIDERATIONS

### 13.1 Waste treatment methods

Disposal of waste product, contaminated packaging materials and any excess diluted spray should be in accordance with The Hazardous Waste (England and Wales) Regulations 2005 and any other applicable local or national legislation (for guidance refer to the DEFRA "Pesticides: Code of Practice for Using Plant Protection Products").

For the handling and management of accidental release, follow the information given under Section 6 and 7.

## 14. TRANSPORT INFORMATION

Land transport ADR/RID

|  |   |
|--|---|
| <b>14.1 UN number</b>  | UN 3082   |
| <b>14.2 UN Proper shipping name</b>  | ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S.<br>(CONTAINS AZOXYSTROBIN)  |
| <b>14.3 Transport hazard class(es)</b>   | 9   |
| <b>14.4 Packing group</b>  | III   |
| <b>14.5 Environmental hazards</b>  | Land transport ADR/RID - Environmentally Hazardous: Yes<br>Maritime transport IMDG - Marine pollutant: Yes<br>Land transport ADR/RID - Tunnel restriction code: E |
| <b>14.6 Special Precautions for User</b>   | The mixture can be transported in bulk.   |
| <b>14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code</b> |   |

## 15. REGULATORY INFORMATION

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

#### EU Regulations

REGULATION (EC) No 1107/2009 of The European Parliament and of the Council of 21 October 2009 concerning the placing of plant protection products on the market and repealing Council Directives 79/117/EEC and 91/414/EEC. Council Directive 67/548/EEC of 27 June 1967 on the approximation of laws, regulations and administrative provisions relating to the classification, packaging and labelling of dangerous substances

DIRECTIVE 1999/45/EC of the European Parliament and of the Council of 31 May 1999 concerning the approximation of the laws, regulations and administrative provisions of the Member States relating to the classification, packaging and labelling of dangerous preparations.

REGULATION (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006.

REGULATION (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC, including amendments.

COMMISSION REGULATION (EU) No 453/2010 of 20 May 2010 amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

#### **National Regulations/legislation:**

The Chemicals (Hazard Information & Packaging for Supply) Regulations 2009 (CHIP 4)  
Health and Safety at Work etc. Act 1974, as amended, the Control of Substances Hazardous to Health Regulations 1999 (COSHH), as amended.

#### **15.2 Chemical Safety Assessment**

No Chemical Safety Assessment under Regulation (EC) 1907/2006 is required and has not been carried out.

## **16. OTHER INFORMATION**

#### **a) Indication of changes:**

This is the 1<sup>st</sup> version of this safety data sheet issued for the UK in accordance with Commission Regulation (EC) 453/2010 (REACH regulation for safety data sheets) and Regulation EC 1272/2008 (CLP regulation).

#### **b) Abbreviations and acronyms:**

N: Dangerous for the environment.

T: Toxic

#### **c) Key literature references and sources for data:**

Agform Limited

ECHA Guidance on the compilation of safety data sheets (Version 1.1, December 2011)

EFSA Journal 2010; 8(4):1542

#### **d) Classification and procedure used to derive the classification for mixtures according to Regulation (EC) 1272/2008 [CLP]**

Acute Toxicity (inhalation) - Calculation method (additivity)

Aquatic Acute 1 – Calculation Method (summation)

Aquatic Chronic 1 – Calculation Method (summation)

#### **e) Relevant R-phrases, H-statements and precautionary statements not written out in full under Sections 2 to 15:**

R23: Toxic by inhalation.

R50/53: Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

H331 Toxic if inhaled

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

#### **f) Training advice:**

General occupational hygiene training recommended.

#### **g) Further information:**

The toxicological data indicated in this MSDS might not in some cases be entirely consistent with the classification of this mixture as it is compiled from a number of different sources.

The information and recommendations in this publication are, to the best of our knowledge, information and belief, accurate at the date of publication. Nothing herein is to be construed as a warranty, expressed or implied. In all cases it is the responsibility of the user to determine the applicability of such information or the suitability of any products for their own particular purpose.

This Material Safety Data Sheet was compiled by Agform Limited in compliance with Regulation (EC) 1907/2006 as amended by 453/2010.
